**WARRANTY**  
LIMITED

Manufactured using 1.5mm thickness sheet steel.

Electrostatic painting provides high resistance to outdoor work site locations.

Hinges are made of high strength steel.

Recessed side handles for easy transportation.

Skids are pre-punched to align with casters or bolting applications.

Recessed and concealed locking areas protects padlock against drills and bolt cutters.

**Applications**

- Ideal for easy and safe storage of tools and equipment in a temporary work site for builders and masonry.

**Benefits**

- Greater Storage Space allows more tools to be guarded in an orderly and safer way.
- Easier to guard and transport tools. Preventing Deterioration or misplacement.

Overlapping lid design provides protection from the weather and forced entry.
